

Wood is a natural material, and variations will occur in color, grain pattern, and character marks. Because of these natural irregularities, each veneer will have its own variation in color, grain structure, and texture.

Each tree species has unique qualities, and the way in which the wood is sliced will produce different grain characteristics. Every grain pattern is a one-of-a-kind, unique and natural design.

Wood will age and lighten or darken as it goes through a natural maturation process. Color changes occur because wood is an organic material. The rate and degree of color change depends on the species of the tree, its growing conditions, and the conditions of the environment it is exposed to after being made into furniture. Direct and constant sunlight (natural or synthetic) will age any wood product.

To ensure an understanding of the color ranges and characteristic variations of natural veneer, this sign-off sheet is required prior to orders being accepted for this clear coat finish.

If signing on behalf of the customer and/or designer, you are acknowledging the design intent and have educated the customer on the variations and material aging that will occur with a clear coat finish.

Materials are displayed for reference and may vary by screen. Please refer to a physical sample before specification.

COMPANY'S (customer) CONTACT SIGNATURE REQUIRED (sign here): _____

name of company match is for: _____

date: _____

company site ID of customer: _____
